

## ALK Positive Lung Cancer (UK)

A Registered Charity

[www.alkpositive.org.uk](http://www.alkpositive.org.uk)

Dear Healthcare Professional,

ALK Positive (UK) is a registered charity and was created as a support group where Non-Small Cell Lung Cancer (NSCLC) patients (and their carers) with the Anaplastic Lymphoma Kinase (ALK) gene mutation/rearrangement could get support from like patients. NSCLC ALK-positive patients make up only about five percent of all lung cancer diagnoses each year.

We are aware that, in the UK, there are many existing patients and those yet to be diagnosed that might benefit from joining our support group, so we have developed a flyer and business card for you to share with your ALK-positive patients.

We would be extremely grateful if you could give all your ALK-positive patients either a flyer or card, so they can join our group – we know from personal experience they will find our group extremely helpful. Perhaps you could also display the flyer on a notice board and have some on show for patients/carers to pick up?

Please encourage your ALK patients to come and join us at:

[www.alkpositive.org.uk](http://www.alkpositive.org.uk)

[@UKALK1](https://twitter.com/UKALK1)

[UK ALK Positive Patient Support and Advocacy Group](#)

Please contact us for further copies of both of these items, our email address is

[hello@alkpositive.org.uk](mailto:hello@alkpositive.org.uk)

Many thanks in anticipation of your help in connecting UK ALK-positive patients to this support group.
